DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to an apparatus for aligning and soldering, classified in class 29, subclass 739.
 - II. Claims 16-25, drawn to an assembly method for aligning and soldering, classified in class 29, subclass 832.

The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process: (MPEP § 806.05(e)). In this case the process invention II as claimed can be practiced by another materially different apparatus such as the step of constraining the connectors onto the circuit board (see claim 16, line 8-9) can be practiced with a clamping device or by hand, etc.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

2. A telephone call was made to Brian M. Berliner on 9/25/2003 to request an oral election to the above restriction requirement, but did not result in an election being
